In all of the tables in this document, both the old and the new NQF Levels are shown. In the text (purpose statements, qualification rules, etc), any reference to NQF Levels are to the old levels unless specifically stated otherwise.

This unit standard does not replace any other unit standard and is not replaced by any other unit standard.

PURPOSE OF THE UNIT STANDARD

This Unit Standard is designed to provide credits towards the mathematical literacy requirement of the NQF at Level 4. The essential purposes of the mathematical literacy requirement are that, as the learner progresses with confidence through the levels, the learner will grow in:

A confident, insightful use of mathematics in the management of the needs of everyday living to become a self-managing person

An understanding of mathematical applications that provides insight into the learner's present and future occupational experiences and so develop into a contributing worker

The ability to voice a critical sensitivity to the role of mathematics in a democratic society and so become a participating citizen.

People credited with this unit standard are able to:

Critique and use techniques for collecting, organising and representing data.

Use theoretical and experimental probability to develop models, make predictions and study problems.

Critically interrogate and use probability and statistical models in problem solving and decision making in real-world situations.

LEARNING ASSUMED TO BE IN PLACE AND RECOGNITION OF PRIOR LEARNING

The credit value is based on the assumption that people starting to learn towards this unit standard are competent in Mathematical Literacy and Communications at NQF level 3.

UNIT STANDARD RANGE

This unit standard includes the requirement to:

Critique the selection of samples in terms of size and representativeness.

Identify features of distributions: symmetry and asymmetry, clusters and gaps, and possible outliers in data and consider their effects on the interpretation of the data. Critique the use of data from samples to estimate population statistics.

Apply an understanding of random phenomena to critique and interpret real life and work related situations.

Critique arguments based on probability in terms of an understanding of random behaviour and the law of large numbers (e.g. lottery 'hot' numbers).

Demonstrate understanding of and determine probabilities for independent, disjoint and complementary events.

Judge or critique probability values.

Further range statements are provided for specific outcomes and assessment criteria as needed.

Specific Outcomes and Assessment Criteria:

SPECIFIC OUTCOME 1

Critique and use techniques for collecting, organising and representing data.

OUTCOME NOTES

Specific purposes include:

Determining trends in societal issues such as crime and health;
Identifying relevant characteristics of target groups such as age range, gender, socio-economic group, cultural belief, and performance;
Considering the attitudes or opinions of people on issues.

OUTCOME RANGE

Techniques include:

The formulation of questions in surveys to obtain data;

The methods and devices (e.g. tables of random numbers, calculators or computers) used to select random samples;

Different instruments and scales such as yes/no (dichotomous) and 5 point (Likert scales) and discrete and continuous variables;

Evaluation of data gathering techniques and of data collected so that faults and inconsistencies are identified;

Calculating measures of center and spread such as mean, median, mode, range; and variance;

Using scatter plots and lines of best fit to represent the association between two variables;

Correlation.

ASSESSMENT CRITERIA

ASSESSMENT CRITERION 1

1 Situations or issues that can be dealt with through statistical methods are identified correctly.

ASSESSMENT CRITERION 2

2. Appropriate methods for collecting, recording and organising (data are used so as to maximise efficiency and ensure the resolution of a problem or issue.

ASSESSMENT CRITERION 3

3. Data sources and databases are selected in a manner that ensures the representativeness of the sample and the validity of resolutions.

ASSESSMENT CRITERION 4

4. Activities that could result in contamination of data are identified and explanations are provided of the effects of contaminated data.

ASSESSMENT CRITERION 5

5. Data is gathered using methods appropriate to the data type and purpose for gathering the data.

ASSESSMENT CRITERION 6

6. Data collection methods are used correctly.

ASSESSMENT CRITERION 7

7 Calculations and the use of statistics are correct.

ASSESSMENT CRITERION 8

8. Graphical representations and numerical summaries are consistent with the data, are clear and appropriate to the situation and target audience.

ASSESSMENT CRITERION 9

9. Resolutions for the situation or issue are supported by the data and are validated in terms of the context.

SPECIFIC OUTCOME 2

Use theoretical and experimental probability to develop models.

OUTCOME NOTES

Use theoretical and experimental probability to develop models, make predictions and study problems.

OUTCOME RANGE

Performance in this specific outcome includes the requirement to:

Use the laws governing independent, complementary and mutually exclusive events.

Determine theoretical and experimental probabilities.

Use simulations (e.g. six sided spinners, random number generators in calculators or computers) for comparing experimental results (e.g.the rolling of a die) with mathematical expectations.

Compare experimental results with mathematical expectations using probability models.

ASSESSMENT CRITERIA

ASSESSMENT CRITERION 1

1. Experiments and simulations are chosen and/or designed appropriately in terms of the situation to be modelled.

ASSESSMENT CRITERION 2

2. Predictions are based on validated experimental or theoretical probabilities.

ASSESSMENT CRITERION 3

3 The results of experiments and simulations are interpreted correctly in terms of the real context.

ASSESSMENT CRITERION 4

4 The outcomes of experiments and simulations are communicated clearly.

SPECIFIC OUTCOME 3

Critically interrogate and use probability and statistical models.

OUTCOME NOTES

Critically interrogate and use probability and statistical models in problem solving and decision making in real world situations.

OUTCOME RANGE

Performance in this specific outcome includes, the requirement to:

Source and interpret information from a variety of sources including databases.

Manipulate data in different ways to support opposing conclusions.

Evaluate statistically based arguments and make recommendations and describe the use and misuse of statistics in society.

Make inferences about a population on the basis of a sample selected from it.

Make comparisons between predictions and actual occurrences.

ASSESSMENT CRITERIA

ASSESSMENT CRITERION 1

1. Statistics generated from the data are interpreted meaningfully and interpretations are justified or critiqued.

ASSESSMENT CRITERION 2

2. Assumptions made in the collection or generation of data and statistics are defined or critiqued appropriately.

ASSESSMENT CRITERION 3

3. Tables, diagrams, charts and graphs are used or critiqued appropriately in the analysis and representation of data, statistics and probability values.

ASSESSMENT CRITERION 4

4 Predictions, conclusions and judgements are made on the basis of valid arguments and supporting data, statistics and probability models.

ASSESSMENT CRITERION 5

5. Evaluations of the statistics identify potential sources of bias, errors in measurement, potential uses and misuses and their effects.

ASSESSMENT CRITERION RANGE

Effects on arguments, judgements, conclusions and ultimately the audience.

UNIT STANDARD ACCREDITATION AND MODERATION OPTIONS

- This Unit Standard will be assessed by an assessor and moderated by a moderator, registered with the relevant accredited ETQA responsible for the quality assurance of this Unit Standard.
- Any institution offering learning that will enable achievement of this Unit Standard must be accredited as a provider through the appropriate quality assuring ETQA, or Learning Programme approval with an ETQA that has a Memorandum of Understanding with the quality assuring ETQA.
- Verification (external moderation) of assessment and moderation by the provider, will be conducted by the relevant quality assuring ETQA according to the moderation guidelines in the relevant Qualification and the agreed ETQA policy and procedures.
- An individual wishing to be assessed through RPL against this Unit Standard, may apply to an assessment agency or provider institution accredited by the relevant quality assuring ETQA, or by an ETQA that has a formal agreement/accreditation with the relevant quality assuring ETQA.

UNIT STANDARD ESSENTIAL EMBEDDED KNOWLEDGE

The following essential embedded knowledge will be assessed through assessment of the specific outcomes in terms of the stipulated assessment criteria. Candidates are unlikely to achieve all the specific outcomes, to the standards described in the assessment criteria, without knowledge of the listed embedded knowledge. This means that the possession or lack of the knowledge can be inferred directly from the quality of the candidate`s performance against the standards.

Methods for collecting, organising and analysing data

Measures of center and spread

Techniques for representing and evaluating statistics

Randomness, probability and association.

Critical Cross-field Outcomes (CCFO):

UNIT STANDARD CCFO IDENTIFYING

Identify and solve problems using critical and creative thinking:
Solve a variety of problems based on data, statistics and probability.

UNIT STANDARD CCFO COLLECTING

Collect, analyse, organise and critically evaluate information:
Gather, organise, evaluate and critically interpret data and statistics to make sense of situations.

UNIT STANDARD CCFO COMMUNICATING

Communicate effectively:

Use everyday language and mathematical language to represent data, statistics and probability and effectively communicate or critique conclusions.

UNIT STANDARD CCFO CONTRIBUTING

Use mathematics:

Use mathematics to critically analyse, describe and represent situations and to solve problems related to the life or work situations of the adult with increasing responsibilities.

PROVIDERS CURRENTLY ACCREDITED TO OFFER THIS UNIT STANDARD:

This information shows the current accreditations (i.e. those not past their accreditation end dates), and is the most complete record available to SAQA as of today. Some Quality Assuring Bodies have a lag in their recording systems for provider accreditation, in turn leading to a lag in notifying SAQA of all the providers that they have accredited to offer qualifications and unit standards, as well as any extensions to accreditation end dates. The relevant Quality Assuring Body should be notified if a record appears to be missing from here.
